Remote ON/OFF

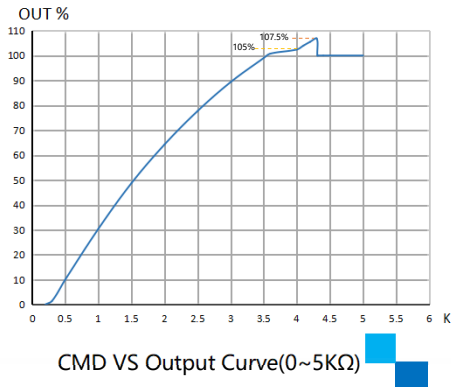

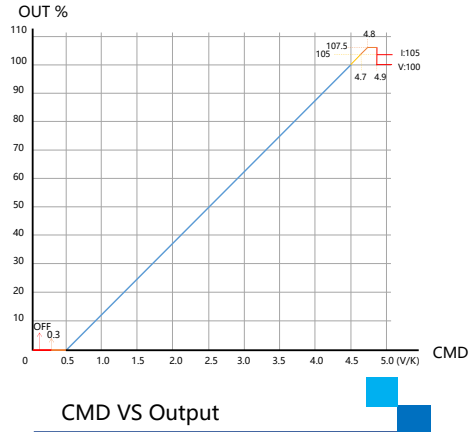

(a) Using internal 5V auxiliary source (Default Setting)

(b) Using external voltage source

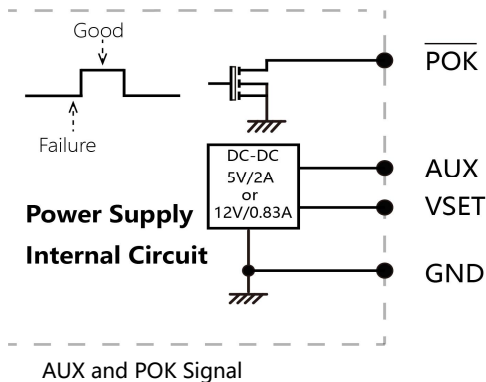

(c) ON / OFF Control by NPN transistor

Note:
GND shown in above diagram is referring to the GND of CN2, not the Grounding from main power(V-).

Output Voltage/Current Programming

Power OK Signal & Auxiliary Power Setting

Do not exceed 5V/2A or 12V/0.83A

The grounding of "AUX" power and P.OK signals should be connected to "GND" port. If "V-" is connected as Grounding, make sure to short the GND and V- ports.

*Place an additional capacitor to have a better performance of auxiliary power operation.

Note:
GND shown in above diagram is referring to the GND of CN2, not the Grounding from main power(V-).
